

Park of infrastructural Industries in Arneburg City

photo: Landkreis Stendal, Herr Michael Beckmann

project:	infrastructural measures
location:	Arneburg
services of SMV:	project management
client:	Stadt Arneburg, Landkreis Stendal
building costs:	ca. 40 Mio. EUR
duration:	2002-2007
responsible:	Prof. Dr.-Ing. Willfred Vedder

project description: The development and infrastructural connection of the business park made infrastructural measures necessary. This meant drinking water supply, rainwater usage, connexion railway, new construction of power station for electricity, set up of natural gas supply, electricity (high and medium voltage), etc. It was particularly important to coordinate the respective measures according to the requirements of the city of Arneburg and the Zellstoff Stendal GmbH.

benefits for the client: It was particular important for client to absolutely meet the time schedule and budget. Additionally he had to emphasize on the coordination of the works and consultancy between the city of Arneburg and the Zellstoff Stendal GmbH. The satisfaction of the client with regard to his aims was completely given up to the current time during six years of achievement performance by SMV.
