

Reha-Klinik in Franken, Bad Steben Deutsche Rentenversicherung Bund

project: conversion and modernisation of an existing property

location: Bad Steben

services SMV: project management, site supervision

client: Deutsche Rentenversicherung Bund

architect: Deutsche Rentenversicherung Bund

building costs: 37 Mio. EUR

duration: 1993 – 1999

responsible: Dipl.-Ing. Thomas Lewicz

project description: The Deutsche Rentenversicherung Bund had started with conversion and modernisation works at the rehabilitation hospital Franken in October 1993 which should be finished in September 1997. Objective was to meet the continuously rising standards of medical care within rehabilitation measures and to update the equipment.

project objectives: Main objective of the conversion and modernisation works of the rehabilitation hospital Franken was the update of technical equipment and the securing of an advanced medical care within rehabilitation measures.

benefits for the client: The construction works were finished to the client's and the hospital's utmost satisfaction in due time in autumn 1999. We managed to go below budget due to a very strict cost management and cost effective solutions made by the project manager.
