

## Radio & TV-Broadcasting-Tower at Alexanderplatz, Berlin

**project:** redevelopment of a landmark tower

**location:** Berlin

**services SMV:** project management

**client:** Deutsche TELEKOM AG, Direktion Berlin

**architect:** Prof. Hermann Henselmann

**building costs:** ca. 23 Mio. EUR

**duration:** 1992 - 1996

**responsible:** Dr.-Ing. Rainer Schofer

**project description:**

A legend says that the height of the television tower of Walter Ulbricht was fixed personally. At that time with 365-metre height it was the second-highest tower of Europe which was excelled only by the Moscow television tower. In 1997 the upper end was used and substituted with a point around three metre higher.

The tower ball contains seven floors, two of them are opened for the public traffic: the view floor at 203-metre height and about that the tele-cafe whose outer ring with the tables turns once per half an hour on own axis.

The Berlin landmark the television tower was submitted to a rebuilding and an asbestos renovation. The constructional arrangements and the whole telecommunications were renewed and the lift arrangements were exchanged.

**project features:**

height of building: 368 m
